

LLW Repository Ltd

Waste Service Delivery

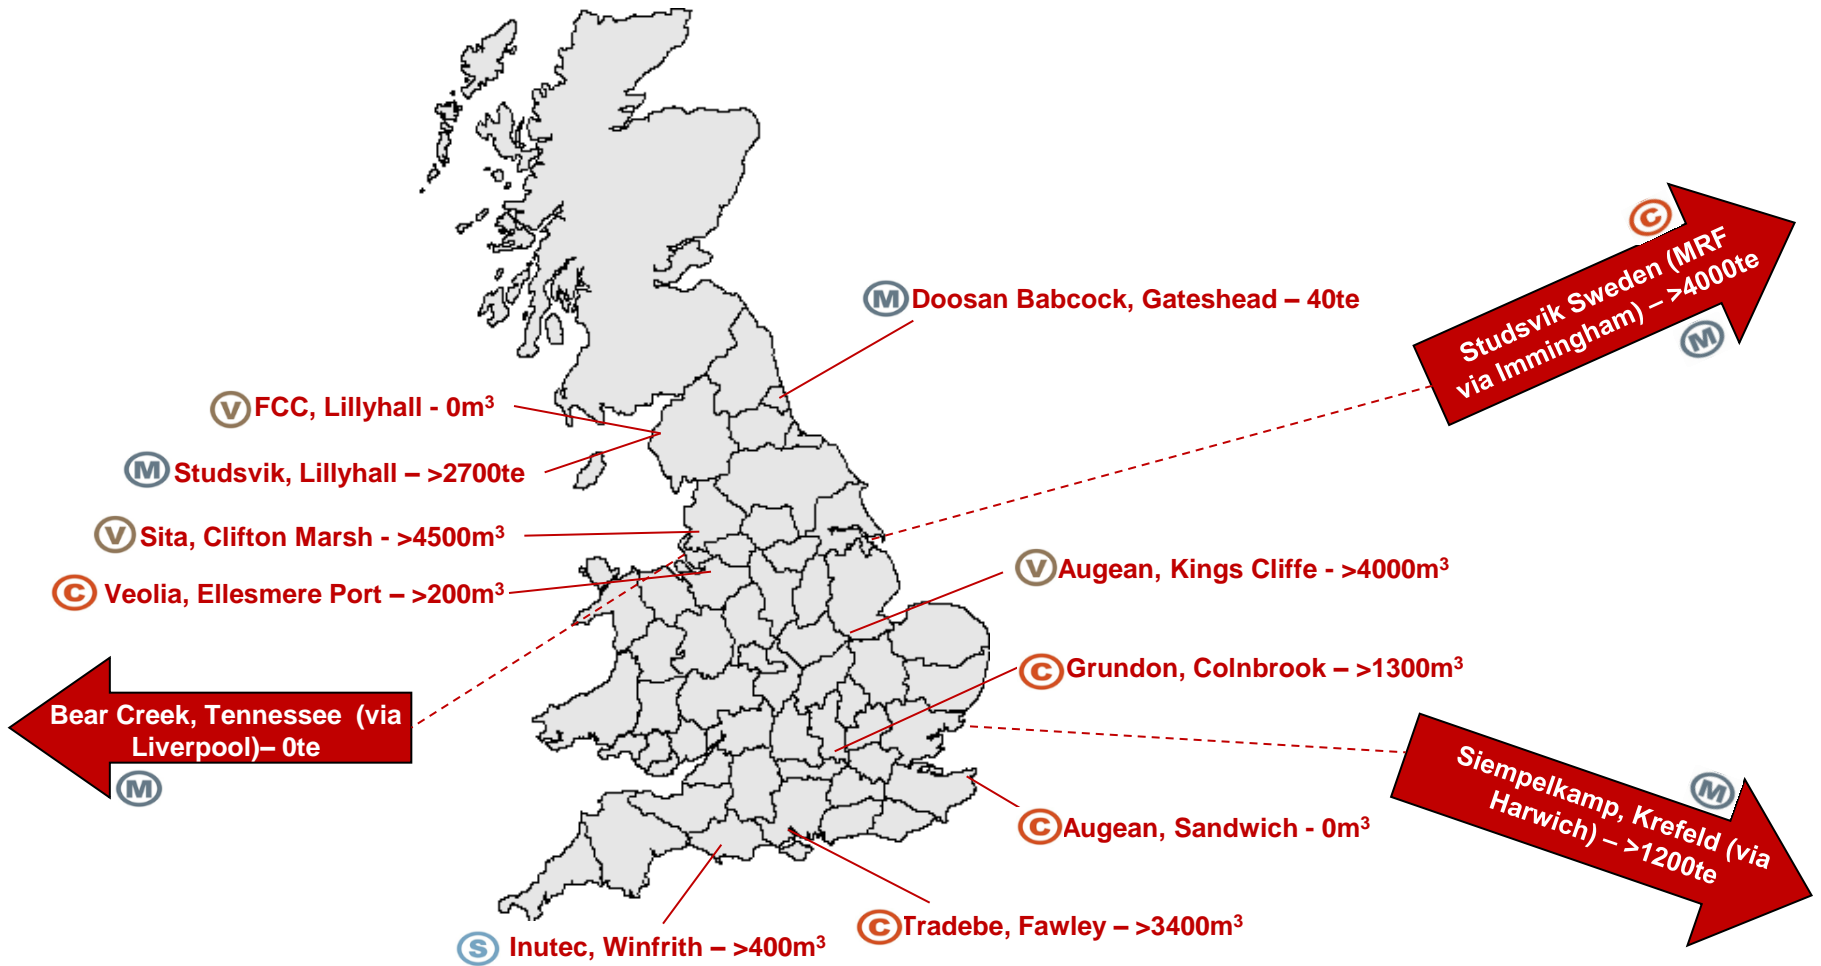

**Dr Craig Ashton CEnv FIEMA
Head of Waste Service Delivery**

Our Business Model

Best Services by the Best People

Deliveries so far

Best Services by the Best People

Service Summary & Future Challenges

- Metallic
 - There's no melting capability in the UK - our need for this will increase further (**along with other nations**)
- Combustible
 - Growing service – clear reduction to Supercompaction and Disposal
 - Sustainable market capable of supporting our future needs
 - Optimised and efficient service established
- VLLW
 - Currently there's an equal spread between Sita and Augean
 - There's still a lot more waste to come – we are therefore hopeful of opening the FCC route soon.
