

NuLeAF Steering Group Transport of Radioactive Materials

Phil Edge, NDA Head of Transport Strategy

11 March 2020

What do we transport? - Rail

- Direct Rail Services is the world leader in transportation of nuclear material by rail
- Safely transported spent nuclear fuel for over 20 years
- Travelled over 5 million miles

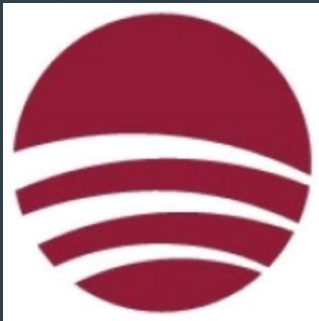

What do we transport? - Sea

- Pacific Nuclear Transport Limited exists to ship HLW, ILW and MOx from Europe to Japan
- PNTL has been operating for more than 40 years

What do we transport? – Road

- Majority of movements managed by LLWR Ltd

New One NDA Transport Division

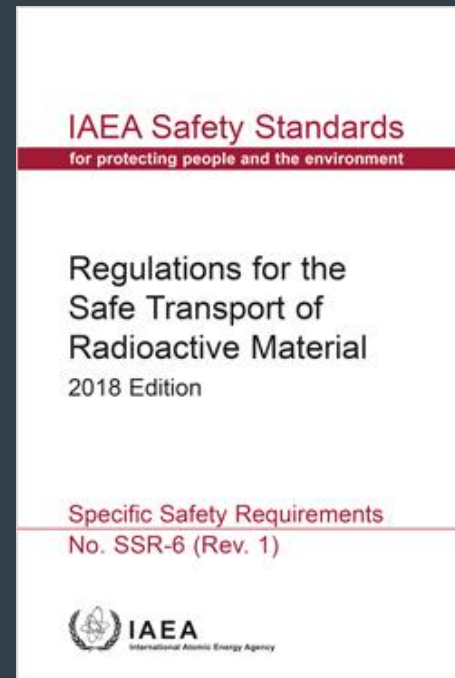

- Create a single world leading nuclear transport division
- Bring together the extensive transport and logistics expertise of INS and DRS
- Support the NDA Group and provide value beyond the NDA mission (in the UK and overseas)

Respected. Included. Performing at our Best.

Safe Transport of Radioactive Material

- Regulation cascades from IAEA Regulations
- Regulations define a “Competent Authority”

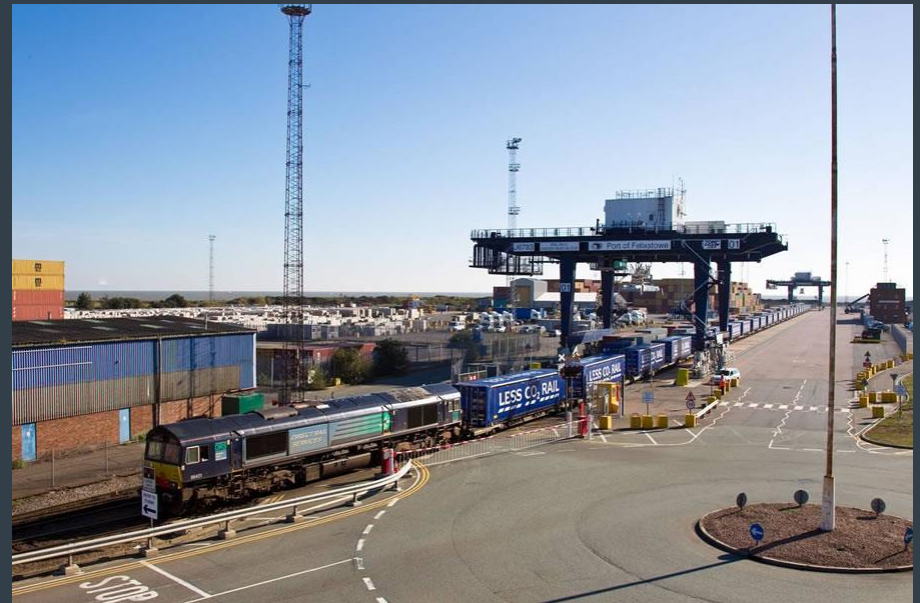

Engagement

- Stakeholder engagement
- Industry groups
- Share international good practice
- Engage with regulators
- Advise, support & consult HMG

Non – Nuclear

- Understand opportunities for movement of non-radioactive materials
- Logistics & distribution
